

# ImplementationPlan.md

Version: 1.6.0 Target: 0.137.1-Beta

## 1. File Identification: web\_app/analyzer/templates/analyzer/multiplier\_dashboard

Version: 0.137.0-Beta

### Surgical Changes

1. Update "View Text Report" Link: Append ?source=mult to the href attribute in the "Multiplier Breakdown (Group Par)" card header.
2. Update "Full Screen (HTML)" Link: Append ?source=mult to the href attribute in the "Multiplier Breakdown (Group Par)" card header.

### Surgical Change Verification (diff)

## 2. Pre-Flight Check

- **Inputs:** manifest\_bundle.txt.
- **Expected Outcome:**
  - Clicking the Text or HTML icon in the top card of the Multiplier Dashboard will pass source=mult to the report viewer.
  - The "Back" button on the report viewer will correctly return to the Multiplier Dashboard instead of the Main Dashboard.
- **Mental Walkthrough:**
  1. User navigates to Multiplier Dashboard.
  2. User clicks the Text Report icon in the top header.
  3. Report Viewer loads.

4. User clicks "Back to Multiplier Dashboard".
  5. User is returned to the correct screen.
- **State Confirmation:** I will request **Confirmed** before delivery.
